

Cf Kf Flange Vacuum Electrode Feedthrough Lead Sealing Assembly For Vacuum Systems

Item Number: KT-VA08

Introduction

Reliable CF/KF flange vacuum electrode feedthrough for high-performance vacuum systems. Ensures superior sealing, conductivity & durability. Customizable options available.

Parameter Description	Options / Specifications
Flange specifications	CF16, CF25, CF40, CF63, CF100, KF16, KF25, KF40, KF50, KF63 (customizable)
Lead length	100mm, 200mm, 300mm, 500mm, 1000mm (customizable)
Maximum operating temperature	400°C (customizable)
Maximum operating pressure	10 ⁻⁸ Pa
Sealing material	Ceramic, metal
